EXPERIENCE

DevOps/Software Engineer **Valeo** *(Contract)* **09/2025 - 09/2026**

- Built and maintained CI/CD pipelines for internal R&D applications, supporting a project presented at the **CES 2026** conference.
- Containerized Flask and React services using Docker in Linux environments.
- Containerized ARM-64 applications and reduced the size by 80% using multi-stage building.
- Developed automation scripts for backup, and system maintenance, reducing manual tasks by 50%.
- Developed server migration and replication script via Python, reducing recovery time from days to under one hour. **Certificate.**

IT Engineer **Sunshine Trading & Contracting Company** *(Freelance)* **07/2025 - 09/2025**

- Maintained company network infrastructure, servers, and 20+ workstation systems.
- Installed, configured, and troubleshot hardware and enterprise software systems across multiple departments.
- Administered Windows Server and Linux environments. **Certificate.**

DevOps Engineer **MCIT (DEPI)** *(Internship)* **06/2024 - 01/2025**

- Developed CI/CD pipelines using Jenkins for automated build and deployment.
- Containerized and deployed applications in Linux environments using Docker and Ansible.
- Automated testing and deployment workflows using Bash and Python. **Certificate**.

PROJECTS

End-to-End Cloud Native Microservices E-commerce Platform.

- Architected & Containerized a full-stack microservices e-commerce application using Docker, implementing Init Containers to enforce service startup dependencies and prevent race conditions.
- Implemented Serverless Auto-Scaling via Knative to enable scale-to-zero capabilities.
- Built Automated CI/CD Pipelines using Azure DevOps to automatically build, tag, and push Docker images to DockerHub.
- Provisioned & Managed a Multi-Node Kubernetes Cluster on AWS EC2 using kubeadm.
- Designed Secure Cloud Infrastructure & Storage on AWS by deploying worker nodes in Private Subnets behind a NAT Gateway, configuring AWS ALB with Nginx Ingress, enforcing secure access via AWS SSM & IAM, and engineering dynamic persistent storage using AWS EFS CSI Driver.

Tech Stack: Kubernetes, AWS (EC2, VPC, ALB, EFS, IAM, SSM), GitHub, Helm, Knative, Azure DevOps, Docker, Nginx Ingress, MongoDB, Bash scripting, Javascript (Express, React, Node)

IoT based Earthquake Station.

- Built a real-time seismic monitoring system using Express.js, MySQL, and Socket.io for live data streaming.
- Used Socket.io for live data streaming with 0.002 seconds of latency.
- Integrated STM32 sensor devices with REST APIs for data ingestion and analysis.
- Containerized backend and frontend services with Docker; implemented Python-based signal filtering.

Tech Stack: Python (FastAPI), Javascript (Express, React, Node), MySql, Docker, C, STM32

Full Stack E-commerce.

- Developed MERN-based e-commerce platform with authentication, product management, and order processing.
- Implemented JWT authentication and integrated Stripe payment gateway.
- Containerized services with Docker and added monitoring using cAdvisor, Prometheus and Grafana.

Tech Stack: Javascript (Express, React, Node), MongoDB, Docker

Spring Boot Petclinic Application.

- Containerized multi-service Spring Boot application using Docker.
- Implemented CI/CD pipelines with Jenkins for automated build and deployment.

Tech Stack: Python, Jenkins, Docker, Bash scripting

ACHIEVEMENTS

- Ranked **1st** in the **Problem Solving Contest**, MSA university, CSE Department 12/2024.
- Identified and reported critical IDOR flaws in an e-learning platform, earning an **appreciation letter**.

EDUCATION

Degree	Institute	Grade	Date
B.Eng. Computer Systems Engineering	University of Greenwich	3.45 GPA	09/2019 - 07/2025
B.Eng. Computer Systems Engineering	MSA University	3.02 GPA	09/2019 - 07/2025
Diploma in DevOps Engineering Program	IT-Gate Academy	...	02/2026 - Current
Diploma in MERN Full Stack Web Development	AMIT	90%	07/2024 - 03/2025
Diploma in CCNA 200-301 & MCSA	IT-Gate Academy	Very Good	04/2022 - 11/2022

SKILLS

DevOps Tools : Docker | Ansible | Kubernetes | k3s | HELM Chart | Knative

CI/CD Automation : Jenkins | Argo CD | GitHub Actions | Azure DevOps

Cloud & IaC : Azure (AZ-400) | AWS | Terraform

Monitoring : Prometheus | Grafana | Kibana

Programming & Scripting : C | JavaScript | TypeScript | Python | Bash

Backend : Socket.io | Express | NestJS | FastAPI | Flask | Django | Stripe | Pytest

Frontend : React | Redux Toolkit(RTK) | Next JS | Tailwind

Databases : MongoDB | MySQL | Exposure to Redis
